PARK AND FRANK STREET RECONSTRUCTION PROJECT UPDATE 9/09/2015

This notice is to advise you that the Park Street and Frank Street Reconstruction Project will begin Stage 2 on September 10th with mailboxes being removed and on September 11th removal of concrete will begin. Residents in Stage 2 must have vehicles out of their driveways before 7:00 AM on Friday, September 11th. The contractor will be working Monday through Saturday on this project.

All residents in Stage 1 have access and should park vehicles in their driveway to allow street parking for residents in Stage 2 having the street re-paved in front of their homes. There will be **no parking on the west side of Park Street** throughout the construction to maintain access to the hydrants and passage of emergency vehicles.

When the contractor removes your curbside mailbox for construction it will be placed on your lawn. Please store the mailbox until you are notified to place it out for the contractor to reinstall the mailbox.

The mail service for Stage 2 will be performed by use of a temporary pick up box at the intersection of Park Street and Frank Street.

Place your trash out as usual at the end of your driveway (after 6:00 PM the previous evening and no later than 7:00 AM on the day of pick up) for the contractor to take it for collection by Rizzo. **Mark your address in bold letters** on your trash and recycling carts to assist in the return.

Please remove any landscaping installed in the City right-of-way. Mark sprinkler heads located in the City right-of-way as MISS DIG does not have a record of these and if marked there will be less chance of damage (City of Roseville is not responsible for any damage to sprinkler systems in the right-of-way). During the removal of approaches and the street anything in the right-of-way will also be removed and discarded.

At this time, we would like to apologize for any inconvenience. We thank you for your patience and cooperation during this project. If you have any questions please contact the City of Roseville Engineering Department at (586) 445-5445.
